ABOUT ME

Passionate about software engineering and problem-solving, I'm a Computer Engineering student with hands-on experience in machine vision and robotics, having contributed to both software and electrical aspects in my university's robotics team.

EDUCATION

Islamic Azad University, Science and Research Branch | 2023-now

Computer Engineering

Current-GPA: 18.37 (Ranked 1257 in Region 1, Nationwide University Exam 1402 – Also admitted to Iran University of Science and Technology (IUST))

CERTIFICATION

- The Odin Project – Full Stack JavaScript, React
 - Mftplus Technical Complex– **SEO** Course
 - RoboCup Iran Open 2025 – International Competition
 - Awarded To: Niusha Ebrahimi, Team: SRBCE.B, League: Self-Driving Car
 - Date: April 20–22, 2025
-

SKILLS

PROGRAMMING LANGUAGES

- Python
- JavaScript

LANGUAGES

Persian - Native
English - Fluent
German - Intermediate

FRAMEWORKS, LIBRARIES & TOOLS

- **FRONTEND / WEB:**
 - HTML, CSS, JavaScript
 - React.js
 - WordPress
- **Data Science / ML:**
 - Pandas
 - Matplotlib
 - Scikit-learn (sklearn)
- **COMPUTER VISION:**
 - OpenCV
 - NumPy
- **LINUX**
- **GIT/GITHUB**

PROJECTS

Web Applications & Frontend Clones:

Developed multiple responsive websites using modern frontend technologies, hosted on GitHub and CodePen to demonstrate proficiency in DOM manipulation, component-based design, and responsive layouts.

Traffic Light Detection System for Autonomous Vehicle

Played a key role in the SRBCE.B team for RoboCup Iran Open 2025, Designed an OpenCV-based pipeline to detect traffic lights in real time; deployed on Raspberry Pi for autonomous vehicle perception.

Email Job Opportunity Classifier

Developed a text classification model using Gmail API and Naive Bayes to filter job-related emails with high accuracy, demonstrating practical ML for automation.

University Projects

Handmade Key Board with Arduino Pro Micro with hand-soldered circuit and mechanical switches and software debouncing for reliable input.

JOB EXPERIENCE

Private Contractor

Built and launched a custom WordPress site with hand-written CSS, optimized for speed and responsiveness. Configured caching, SEO, CDN, and secure hosting to ensure fast load times and reliable performance in production.
